

GLOBAL TIMBER.

**RESPECT  
FOR  
NATURE**

**WOOD  
FOR  
GOOD**

### **WE MAKE A POSITIVE DIFFERENCE**

Wood improves the indoor climate for millions of people around the world.

### **WE ALWAYS TRADE RESPONSIBLY**

Global Timber is FSC® (FSC C018269) and PEFC™-certified and meets EUTR-requirements.

### **GUARANTEED SUSTAINABLE QUALITY**

When you choose hardwood, you obtain a quality product that lasts forever.

## **WOOD IS GENIUS**

Wood is a 100% natural resource and as a raw material, nothing is more environmentally friendly.

Trees grow with solar energy and repay generously by removing and storing carbon from the atmosphere.

As a living material, wood improves air quality. Furthermore, it is proven that wood is good for your health and mental well-being.

# BALANCING NATURE

Responsible Sourcing

It is important to us, to protect the forests, where we source our wood.

Certified wood is a guarantee that no more trees are to be felled than the forest can recover.

That animals and plant life are protected and that the workers in the forests are guaranteed education, safety equipment and a decent salary.

## Why Wood

Wood improves the quality of life for millions of people around the world.

Sustainable managed forests are the best way to preserve standing forests. Wood from certified forests is an environmentally friendly material and contributes to a better carbon balance.

## Respect for the Environment

Global Timber's environmental policy is based on respect for our natural resources and on the importance, forests have for the climate.

We ensure that trees are felled legally, in accordance with international standards and in accordance with local regulations and legislation in our partners' countries.

In this way we can guarantee our customers a product with a good conscience and in consideration for the environment.

*Read more about our responsibility and environmental policy, which contributes to a balanced nature around the world's forests.*

We make a difference

# RESPONSIBLE FOR COMING GENERATIONS

We have a vested interest in taking care of nature, because it ensures the source of our wood remains intact.

Product development and a good economy go hand in hand with environmental responsibility - one is simply a prerequisite for the other.

The environment is highly prioritized in Global Timber's business philosophy, where the goal is to leave as small and gentle marks on the environment as possible.

As a company within the hardwood industry, we have already made a serious choice, conducting our business around a sustainable material. The influence we have, pushing more wood into future constructions, leaves a positive mark for future generations.

## **A Collaborative Achievement**

We collectively strive to protect the environment. Both as a company, but also as individuals. In Global Timber's business philosophy, we strive to:

- Our environmental efforts are constantly prioritized and continuously optimized.
- Employees must be trained and motivated continuously to work responsibly with the environment.
- Ensuring procurement of raw materials, internal production processes, selection of sub-suppliers and transport is conducted regarding both to the environment and costs.
- Establish good relations with authorities and follow applicable rules and regulations.
